An Equal Opportunity Employer

Indiana's non-seasonally adjusted unemployment rate for December is 4.9 percent, five-tenths of a percentage point below the national rate of 5.4 percent, Craig E. Hartzler, Commissioner for the Indiana Department of Workforce Development, announced today. The number of Hoosiers employed during December 2001 was 2,956,600.

Indiana's December unemployment rate was lower than Illinois, 5.7 percent; Kentucky, 5.2 percent and Michigan 5.6 percent. Only Ohio was lower at 4.5 percent.

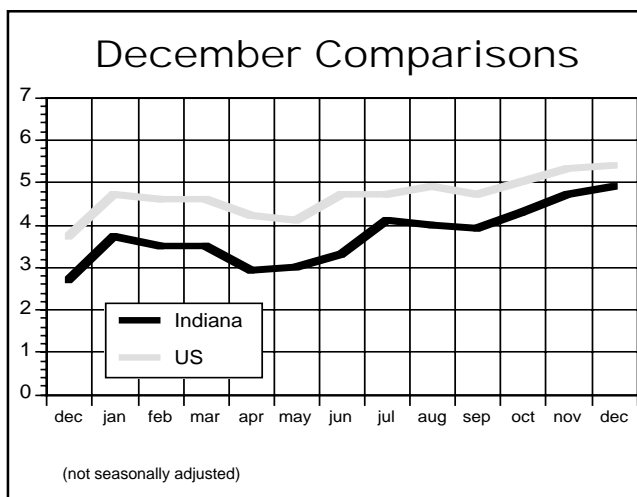

"Indiana's unemployment rate increased again in December as a result of the recession in our state. During this difficult time, we are very concerned about the more than 150,000 unemployed Hoosiers," commented Hartzler.

The monthly survey of 7,500 Hoosier employers reports payroll employment at 2,986,800, a decrease of 51,200 from one year ago and 7,900 less than last month. Payroll employment is an estimate of non-agricultural jobs in Indiana businesses. It differs from labor force employment which is used in the calculation of the unemployment rate by not including the self-employed and agricultural workers. In addition, payroll employment includes all those who work in Indiana, while the unemployment rate is calculated by those who live in Indiana.

Manufacturing employment totals 640,700 in December, a decrease of 36,700 from last year. Motor vehicle manufacturing accounts for 92,500 jobs, 4,900 less than one year ago. Manufacturing of motor vehicle parts totals 59,200. Industrial machinery manufacturing in December accounts for 67,600 Hoosier jobs, 400 less than November.

Construction employment totals 148,500 a decrease of 7,400 from last month. Of that, heavy construction reports 15,600 jobs, a decrease of 500 from last year.

Service producing employment totals 2,191,700 in December, 14,600 less than last year. Transportation and public utilities total 145,200, 700 more than November.

(over)

Retail trade totals 573,600, 10,600 less than a year ago. Of that, general merchandise stores report employment of 88,600, or 4,400 less than last year. Service sector employment, such as business services, computer and data processing, totals 761,100 in December, which is 1,000 more than the previous year.

Indiana's estimated labor force (the number of people 16 years of age and older who are able and available for work) totals 3,107,800 in December 2001. An estimated 2,956,600 Hoosiers are employed and 151,200 are unemployed.

Indiana's labor force for December 2000 totaled 3,092,100. Hoosiers employed one year ago is estimated at 3,007,300, and December 2000 unemployed in Indiana totaled 84,800. Indiana's estimated unemployment rate one year ago was 2.7 percent, compared with the national unemployment rate of 3.7 percent in December 2000.\*

\*Due to an expansion in the Current Population Survey (CPS), mandated by Congress, estimates for June 2001 (revised) and later at both the state and substate levels may not be fully comparable with those of earlier periods. In analyzing data, be aware that over-the-year comparisons, may differ slightly from comparisons that would have been made using data without the sample expansion. More detailed information can be found at <http://stats.bls.gov/launews1.htm>.
